SUMMARY

Staff Engineer with **8+ years** of experience building scalable systems and solving complex problems. Specializes in **backend architecture, microservices, and system design**; passionate about clean code, mentoring developers, and building products that scale to **millions of users**.

EMPLOYMENT

Staff Engineer HighLevel 2025 – Present

- Driving technical excellence and architecting scalable backend solutions serving **millions of users**.
- Leading architecture for **backend systems, microservices, and system design** across product teams; mentoring engineers.

Lead Engineer HighLevel 2022 – 2025

- Led a team of engineers delivering backend services and product features at scale.

Senior Software Engineer Kuvera Sep 2021 – 2022

- Integrated **Prometheus** and **Grafana** to improve performance and scale monitoring of the whole application.
- Replaced traditional search with **Elasticsearch** indexes, delivering the fastest and best matches for global asset search.
- Architected and developed a generic **Ruby on Rails** backend for the Fixed Deposit product, enabling new partners to be added quickly.
- Drove migration of the monolithic application to **microservices** based on product requirements.

Sr. Executive (Full Stack Developer) SMS India Pvt. Ltd. Feb 2021 – Aug 2021

- Created REST APIs with **Python / FastAPI** enabling other platforms and customers to integrate seamlessly.
- Designed and implemented an **Angular** application converting business logic into the user-facing interface.
- Delivered APIs with **90% test coverage** via unit and integration tests in PyTest; integrated SSO with role-based authentication and authorization.

Software Engineer Coditas Solutions LLP, Pune

Jun 2018 – Feb 2021

- MEAN-stack developer owning client communication, requirements, and feature delivery.
- Refactored REST API services to a **microservices architecture**, migrating the codebase to **TypeScript** (Node.js, Express, MongoDB).
- Moved underlying services to **AWS Lambda** (serverless), improving application performance by **20%**.
- Restructured an Angular 8 application with **NgRx** state management; integrated Twilio, AWS SES, SQS, and Docker.

Web Developer WebMatrix Technologies, Pune

Nov 2017 – May 2018

- Rewrote an AngularJS application to **Angular 2**; built REST APIs in Node.js and Express.
- Implemented authentication and authorization using a **JSON Web Token** strategy.

SKILLS

Languages: JavaScript, TypeScript, Python, Ruby, Go

Frameworks: Node.js, Express, Angular, React, Vue, FastAPI, Ruby on Rails

Databases: MongoDB, MySQL, Postgres, Elasticsearch

Tools & Infra: Prometheus, Grafana, Docker, AWS, Git, Jenkins

Practices: System design, microservices, Agile

EDUCATION

B.E. in Computer Engineering Savitribai Phule Pune University

2021

Diploma in Computer Engineering MSBTE

2012 – 2015

PERSONAL PROJECTS

Personal website shrd.in

- Portfolio built with Astro — static output, self-hosted fonts, optimized to near-perfect Lighthouse scores.

Anstagram github.com/shindesharad71/Anstagram

- Instagram clone built with Angular 8, Node.js, and MongoDB; NRWL monorepo tooling, Nginx reverse proxy for domain mapping and routing.
